

Car Wash SPOTLIGHT

PURECLEAN AUTO SPA

PureClean Auto Spa is Broomfield's newest car wash. Located adjacent to Flatirons Mall, *PureClean Auto Spa* features a *Jim Coleman Company Water Wizard 2.0* automatic and 5 self service bays, with room for an additional automatic.

The owner decided to design, build, operate and market the car wash with the environment in mind from the ground up. Waste water from the car wash flows into *PureClean's* reclaim system which cleans the water down to 5 micron clarity. This water is then treated with ozone, eliminating any odor and is reused in the automatic. The site is also powered by a 10 kilowatt solar photovoltaic system mounted on the roof.

PureClean's Water Wizard 2.0 features all the standard features such as contouring high pressure wash, chemical tire applicators, 30 horsepower worth of dryers and *Rain-X® Total Body Protectant*.

In the self service bays *PureClean* offers all the standard functions including bug remover and magnesium chloride remover. Their meterboxes feature *Mars* bill validators as well as a *Washgear Credit Card System* which provides credit, fleet and gift card services for the entire wash.
